Wr.

Wr- (r), a consonantal combination occurring initially in a number of words (frequently implying twisting or distortion), the earlier of which usually have cognates with the same initial sounds in the older Germanic languages. The combination is regularly preserved in Gothic, OS , OFris., and OE., but in OHG. is reduced to *r* In ON the *w* was lost before *rð*, *rl*, at an early date over the whole Scandinavian area , at a later period in all other words in ONorw and OIcel. In the modern Germanic tongues *wr-* remains in Du , Flem., LG., and Fris., and is represented by *wr-* in Da , Sw , and some Norw. dialects.

Some 130 words in *wr-* are recorded from the Ob. period, and a number of these survive in the later language, while others have been added from Du and LG Early difficulty in pronouncing the combination may be indicated by the Old Northumbrian spellings with *wor-*, and by the 14–15th cent. *wersti* ' wrist', *wer angust* ' wrongous'. The *r* is sometimes separated from the *w* by metathesis, as in ME. *werð* for *wræð* ' wroth', *werch* for *wrech* ' wretch ', *wirlen* for *writlen* ; but conversely *wr-* may arise from the same cause, as in OE. *wrythta* ' wright ', for *wyrhta*. Signs of the dropping of the *w* began to appear about the middle of the 15th cent. in such spellings as *rang* for *wrang* v., *rong* for *wrong* adj , these become common in the 16th cent. (for examples see Wrangle, Wrap, Wrack, Wreck, Wrench, Wrest, etc) Reduction of the sound is also indicated by the conversc practice of writing *wr-* for *r-*, which similarly appears in the 15th cent. (in *wroth* for *rathe*), and becomes common in the 16th ; for examples see the subordinate entries under Wrack, Wrecked, Wrigged, Wrap, Wrape, Wretchless, etc. In standard English the *w* was finally dropped in the 17th century ; it has remained (though now obsolescent) in Scottish, and in some south-western English dialects is represented by *v*, which is also regular in northeastern Scottish.

The phonetists Bullokar (*Amendment of Orthographie*, 1580) and Gill (*Logonomia*, 1621) have *wr-* throughout, and no doubt pronounced the *w* Later authorities, e.g. R. Hodges (*English Primrose*, 1644), mark the *w* in this combination as silent

PREFACE TO LETTERS X, Y, Z

THIS portion of the Dictionary, which treats of the words beginning with X, Y, and Z, and thus forms the final section of the whole work, contains in all 4746 entries. Of that number 1722 are Main words, 2312 are Subordinate entries of obsolete forms, etc., of which 1084 are compounds of the prefix *y-*, 216 are Special combinations, and 496 are Obvious combinations not requiring explanation. Of the Main words 1311 are still in current use, 270 are now obsolete, and 141 are alien or not completely naturalized. The number of illustrative quotations for the three letters is 12,580, of which X supplies 557, Y 9900, and Z 2123.*

Of the three letters dealt with in this section, X and Z are alike in comprising very little that is not of alien origin, whereas Y, except for certain words from Eastern or aboriginal languages, is Germanic. The history of the letters themselves is of unusual interest; the necessity of cross-references from one to the other indicating their points of contact is a remarkable feature. The name *yogh* of the Middle English letter ȝ finds a place in a dictionary for the first time here. The various monosyllabic names of Z, viz. *zad*, *zard*, *zed*, *zee*, are recorded in their several alphabetical places. Words having initial X are with few exceptions derived ultimately from Greek, and are of a technical character. *X rays* and *Xylonite* are the only two that are generally familiar. The oriental *xebec*, the town-name *Xeres* (the original of *sherry*), and the abbreviation *Xmas* are worthy of note. The vocabulary of Z is larger and more varied. The most important Greek derivatives, mostly acquired through the medium of Latin, are *zeal* with its connexions *zealous*, *zealot*, *zelator*, and *zelotic*, *zephyr*, *zetetic*, *zeugma*, *Zeus*, *zizany*, *zizyphus*, *zone*, and the groups of words depending on *ζωή* life, *ζῷον* animal (including *zodiac*), *ζυγόν* yoke, and *ζύμη* ferment. The number of words traceable to some Semitic language is considerable: among them are *zagaie*, *Zamzummim*, *zarf*, *zariba*, *zarnich*, *zecchin*, *zedoary*, *zenith*, *zero*, *zibet*, *ziczac*, *Zion*, *ziralect*, *zuz*. From India comes the following, several being of Persian origin: *zamorin*, *zayat*, *zemindar*, *zenana*, *zendik*, *zerumbet*, *zillah*, *zumbooruk*. The Romance languages have supplied some dozen words; *zest* and *zouave* come directly from French, while *zany* and *zero* have a Franco-Italian origin; in *zendalet* and *zucchetto* we have perversion or misuse of Italian words; from Spanish come *zabra*, *zamarra*, *zambo*, *zambra*, *zorro*, *zumbador*. From Modern German we have *zeitgeist*, *Zeppelin*, *zinc*, *zinke*, *zither*, *zizel*, *zollverein*, *zwanziger*, together with most of the names of minerals, which are extraordinarily numerous, and comprise *zaratite*, *zeagonite*, *zeilanite*, *zeolite*, *zeuncrite*, *zircon*, etc., *zorgite*, *zunyite*, *zurlite*, *zwieselite*, *zygadite*. From Slavonic languages are *zemni*, *zibeline* (through French), *zolotnik*; from languages of Africa, *zebra* and *Zulu*; from Turkish *zaptieh*, from Tibetan *zho*, from Mexican *zopilote*. South African Dutch gives *zuur-veldt*, and the artificial invention *Zarp*, which has an analogue in the recently coined *Anzac*. Articles of etymological interest or curiosity will be found under the headings *zamia*, *zegedine*, *Zend-Avesta*, *zenzic*, *zest* sb.[1], and *zoca*.

The outstanding characteristic of the letter Y is its wealth of ancient monosyllables; a large number of them are in very common use at the present day, such as *yard*, *yarn*, *yawn*, *yea*, *year*, *yearn*, *yeast*, *yell*, *yelp*, *yes*, *yet* adv., *yew*, *yield*, *yoke*, *yolk*, *yore*, *you* and *your*, *young*, *youth*; others are obsolete, archaic, or dialectal, such as *yain*, *yair*, *yap*, *yare*, *yark*, *yarm*, *yate*, *ye*, *yean*, *yed*, *yeie*, *yeke*, *yeld*, *yelt*, *yeme*, *yeo*, *yepe*, *yern*, *yerr*, *yet* vb., *yex*, *yisse*, *yore*, *yote*, *ythe*, *yule*, *yure*. Other important words of native origin are *yarrow* (the plant), *yellow*, *yesterday*, and the obsolete *yever* and *yomer*. Extraordinarily interesting examples of survival of Old English words in modern dialect are *yarrow* adj., *yed*, *yeo* sb.[1], *yes* sb.[1], *yeender*, and *youster*. Y includes a large class of words of an (ultimately) onomatopœic or echoic character; besides those which have their origin in Common Germanic, and are included in the list given above, there are many others that seem to have taken their rise within the borders

* The scale of this work compared with that of some other large dictionaries for this portion of the alphabet is exhibited by the following figures:—

In the corresponding portion of Richardson's Dictionary the number of quotations is 380.

** These high figures are due to the inclusion in these encyclopædic lexicons of many Latin names belonging to the systematic terminology of zoology and botany which do not fall within the scope of this Dictionary.

of English itself; such are *yabble, yack, yaff, yaffle, yammer, yamph, yap, yar(r, yawl, yawp, yaw-yaw, yike, yirr, yo-ho, yoll, yoop, yonf, yow, yowf, yowl, yowt*; of these several express the barking or yelping of dogs. But a great part of Y consists of compounds formed with the prefix Y-, such as the following, not a few of which have a history of several centuries continued down to the modern period by archaistic usage: *yblent, yblessed, yborn, ybound, yclad, yclept, ycore, ydight, y-end, yfed, yfere, yfound, yhere, ykid, yknow, ylike, ymong, ypent, ywroken, ywrought.* In addition to these, there is a multitude of subordinate entries recording Middle English forms of past participles and other words, and thus illustrating with detailed evidence the facts set out in the article on the prefix. Materials of another kind useful for the study of historical English grammar will be found in the numerous entries of dialectal by-forms with initial *ya-, ye-, yi-, yo-*, arising from the development of an Old English *éa, éo*, into *yá, yó*, or the prothesis of a y-glide to an *e* or *i* sound; some of these forms are of sufficient importance to receive the status of Main words, e.g. the Scottish *yill* (= ale) and *yird* (= earth). From alien languages the chief loans are *yacht, yawl, yokudale, younker, yuffrouw* from Dutch or Low German, *yarpha, yemsel, Yggdrasil, yolster* from Scandinavian, *yager, yiddish, yodel* from Modern German, *yam*[2], *yamstchik, yourt, yuft* from Russian, *yaboo, yercum, yoga, yogi, yoni, yug* from various languages of India; *yaourt* (or *yoghurt*), *yataghan*, and *yelek* are Turkish, *yashmak* Arabic, *yamun* and *yulan* Chinese, *yen* Japanese, *yak* Tibetan, *yucca* Carib, *ylang-ylang* Tagalog; *yam*[1], *yapock, yapon, yarak, yari-yari, yarke, yarrau, yate* sb., *yaws* originate mostly in languages of uncivilized peoples, and their immediate source is not in every case ascertainable.

This section involves no very difficult problems of sense-development, but a few articles may be mentioned in which the presentation of meaning and usage reveals points of interest; such are *ye* and *you, yes, yet, yield, young lady, young man.* Problems of etymology are more conspicuous, and it would be possible to draw up a lengthy list of articles in which these have been treated with fuller evidence than hitherto; the following are representative:—the prefix *y-* and the six suffixes *-y, yankee, yawn, yeender, yeic. yellow-hammer, yelve, yeo* sb.[1], *yeoman, yepsen, yere, yerk, yesterday, yfere* adv., *yode, yokel, yokindale, yolk* sb.[2], *yon, yong* sb. and vb., *yule.* Students of Spenser will be interested in the conjecture recorded s. v. *youd* adj.[2]

The material for X, Y, Z passed through the hands of a voluntary subeditor, the Rev. J. Smallpeice, in 1882–4. The first proofs have been read by the Misses Edith and E. P. Thompson, Mr. G. F. Friedrichsen, and the Rev. Canon J. T. Fowler, who have contributed useful corrections or supplementary information. Assistance in the verification of quotations at the British Museum has been given, as heretofore, by Mr. W. W. Jenkinson. For information on special points grateful acknowledgement is due to Dr. A. Beets, of Leiden, Professor Florian Cajori, of Colorado, Dr. A. E. Cowley, Professor Cesare Foligno, Mr. H. T. Gerrans, Mr. L. G. Carr Loughton, Dr. James Morison, the late Dr. E. C. Quiggin, Mr. K. Sisam, Mr. W. H. Stevenson, the librarians of the India Office and the Advocates' Library, Edinburgh, the director of the Victoria and Albert Museum, and the secretary of the British Xylonite Company. The editorial assistants who have taken part in the preparation of this section are: Mr. A. T. Maling, M.A., Mr. F. J. Sweatman, M.A., and Mr. J. W. Birt.

X.

X (eks), pl. X's, *Xs* (e·ksĕz), the twenty-fourth letter of the modern and the twenty-first of the ancient Roman alphabet, corresponding in form and position to the Greek Χ. The early Greek forms + X represented the aspirated voiceless velar (kh) in the Ionian alphabet, and (ks) in the Chalcidian alphabet. (In the former, (ks) was denoted by Ξ, in the latter, (kh) was denoted by Ψ.) **x** was adopted by the Latins with the value (ks) from the Greek alphabet introduced into Italy. The ancient Roman name of the letter was *ix*, which is that given by Ælfric in his Grammar (*c* 1000).

Words having initial *x* (pronounced as *z*) in English are nearly all of Greek origin; a few, as *zebec*, *Xerxes*, have *x* representing early Sp. *x* (now *j*). In OE. *x* was used medially and finally as a variant spelling of *cs* (whether original or standing for *sc*), e.g. *wex*, *eax* = *ecus*, *acus*, *æsc* Ash, *ðxian* = *ðecsian*, *ðscian* to Ask, *fixas*, pl. of *fisc* Fish, *fixian* = *fiscian* to Fish, *woxan* = *woscan* to Wash. Other variants are *cx*, *hx*, *xs*, *cxs*, *hxs*, as *meohx*, *micxes* Mikry, *axian* Asides. Similar spellings occur in the Cotton MS. of Cursor Mundi, e.g. *flexx(e)* flesh, *wexx* wash, *fixxes* fishes; the same MS. has the unexplained spellings *fuxz(o)*, *fouxz(u)*, etc. of Fowl *sb.* In East Anglian texts of the 14th to the 16th century *x* is frequently written for initial *sc*, *sch* in *xal* shall, *xuld* should; *xsal* also is found in the Paston Letters; instances of other words so written are only occasional, e.g. *xad* shed (pa. pple.), *xowyrs* shovers, *xulderys* shoulders. Initial *x* stands for *sh* (or *x*) in early forms of some oriental words, as *xerif* Sherbef (after early Sp. *xerife*), *xaraffe*, *-aff* Sarap, and *Xinto* Shinto. Other temporary uses of *x*, but with its normal value (ks), are found in the once general *axes*, *axis* Access, *hunx* Hunks, and the less common *exelent* Exorlient, *exite* Excite; on the other hand *box* = *pocks* has become permanent, and *sox* has been adopted in the hosiery trade as a convenient shortening of *socks*.

1909 Wells *Kipps* ii. § 1 He would have considered himself the laughing stock of Wood Street if he had chanced to spell *socks* in any way but 'sox'.

The phonetic values of *x* in English are three, of which the commonest is (ks), as in *axis* (æ·ksis), *buxom* (bə·ksəm), *doxology* (dɒksɒ·lŏdʒi), *excuse* (ekskiū·z), *expense* (ekspe·ns), *oxen* (ɒ·ksn), *proximity* (prɒksi·mĭti), *tax* (tæks). The pronunciation of the prefix *ex-* followed by a vowel or *h* varies according as it bears the stress or not, the general rule being that *ex-* = (eks) and *ex-* = (ĕgz), as *exile* (e·ksail), *exact* (ĕgza·kt), *exhort* (ĕgzɔ·t); but there is considerable variety in individual words and individual usage: see Ex- *prefix*1 1 note. The same general principle governs the pronunciation of *anxious* (æ·ŋkʃəs), *anxiety* (æŋzæ·ĭəti), *luxury* (lə·kʃŭri, lə·gzʃəri), *luxurious* (lŏgziū·rĭəs, lŏgzjū·rĭəs), *Alexander* (ælegza·ndə), *Alexandrine* (ælĕgza·ndrin); but here also individual usage varies. The third value (z), arising from a reduction of (gz), is given in all cases to initial *x*, as *Xerxes* (zɜ·ksiz); this value is shown in many instances in the 17th and 18th centuries by the spelling with *z*, as *Zanthian*, *zebeck*, *Zeres*, and instances are not uncommon in the 19th century of *xantho-* and *xylo-* for *zantho-* and *zylo-*; early examples are *Zanctus* Xanthus (Lydg. *Troy Bk.* ii. 731 rubric, 15th cent.), *zyphe* Xiph (1573). Cf. *Sanitippa* Xanthippe (Chaucer), *Cerses* Xerxes (Wyntoun *Chron.*, S.T.S., III. 54). A similar reduction of *x* took place in French:

x, if he be the fyrste letter of a worde, as *xenotrèphe*, *xylobalsome*, whiche they sounde but *z*, sayenge *zenotrophe*, *zylobalsome*, for they can nat gyve *x*, whiche is also a greke letter, is true sownde. (1530 Palsgr. *Eclarc.* i. xxv.)

III. Abbreviations.

6. In writing the name CHRIST, esp. in abbreviated form, X or x represents the first letter (kai) of Gr. ΧΡΙΣΤΟΣ *khristos*, and XP or xp the first two letters (kai ρō). Hence in early times XP̄, in modern times Xt, Xt, and X, are used as abbreviations of the syllable *Christ*, alone or in derivatives; thus †Xpen, †Xpn = CHRISTEN, †Xpened = CHRISTENED; †Xpian, Xtian(ity) = CHRISTIAN(ITY); XMAS (*Xtmas, Xtmas*) = CHRISTMAS.

†Xpc stands for XPC contracted form of ΧΡΙΣΤΟΣ; cf. IHS.

Y.

Y (wɔi), pl. Y's, *Ys* (wɔiz), the twenty fifth letter of the modern and twenty third of the ancient Roman alphabet, representing ultimately Y, Υ (u psilon) of the Greek alphabet, a differentiated form of the primitive V which has given also U and V. It was adopted first in the Latin alphabet in the form V to express *(u)* and *(w)*, and was later (after n.d. 100) readopted in the form Y to represent the Υ of borrowed Greek words.

The name of the letter in the Romanic languages, 'Greek i' (e. g. F. *i grec*, Sp. *i griega*), and the Ger. name *ypsilon*, It. *ipsilon*, *onne* (+*ypsilonne*), and Pg. *ypsilon*, preserve the fact of its Greek origin. The English name *wy* (wai) is of obscure origin.

The earliest available English evidence is in the MS of the Ormulum, col. 209 l. 4370, where Pt is written *upp* in the first hand (*c* 1200) over *y*, the fifth letter of the name ILOOYS. Nothing certain is known about the historical relationship of the English name to the name *wi* or *ui* attributed to 'the Greek y' in the grammatical treatise (*a* 1150) contained in the Bodl. MS of the *Ars* or *Liber* of some OE systems (Sweet Anglia Beiblatt vi 1896). Douglas rhymes *Y* with *lily* (see quot. 1513 in sense 2 below); other early references to the name are —

1573 *Barer Alv.* Y hath bene taken for a greeke vowel and our latin Grammarians greeke while who thinke if we make well we shall finde to be rather a diphthong for it app. seath to be compounded of *u* and *i*, which both spelled together soundeth as we write *Wy*. 1580 Bullokar *Amendm. Orthogr.* 8 The olde name of *y* (which is *wy*).

(1) The letter of which our *y* is the direct representative occurs from the earliest times in OE script to express the *i*-mutation of *u*. It had various forms ranging from those resembling the Greek *u psilon*, in which the tops of the limbs turn outwards in opposite directions, to those in which both limbs turn in the same direction, whether to the right (forming an F like character) or to the left. This last type with the right shank continued leftwards below the line was the form that prevailed in ME script, and which, with the top closed (ꝯ), became identical with the debased forms of þ see (3) below. Most forms of the OE. *y* in the earliest manuscripts are written with a superposed dot, which is also a feature of the *y* in contemporary manuscripts of Latin texts. The dot fell out of use towards the end of the eighth century, but was revived towards the end of the tenth. The dotted *y* continued throughout the ME period, and was carried into some of the early founts of type (e. g. in *The Book of St Albans* of 1486 the dotted *y* is employed in the larger, but not in the smaller type).

In later (West Saxon) OE., *y* was written alternatively for *i*, e. g. in representing older *æ*, as in *cyle*, *cwystan*, *yld*, for *cele*, *cwistan*, *eld*, and, as its function of expressing rounded *i* (ü, ü) was usurped by *u* in imitation of French usage, it became ultimately a possible substitute for vocalic *i* in any position. This use had become established by the middle of the 13th century, and thenceforward, with the deterioration of script, *y* came to serve as a convenient means of breaking up an ambiguous series of minims produced by a succession of *i*, *u*, *n*, *m*, as *syn*, *myne*, *ynnumbe*, *vnnyeth*, for *sun*, *nun*, *vnmen*, *vnmeth*. Thus free use of *y* was continued through the ME. period, and the tradition lasted for a long period after the introduction of printing, but *i* was gradually restored to its place, the resulting orthographic convention being that *y* is retained (1) for final *i*-sounds, as in *fly*, *family*, *daily*, *destroy* (formerly spelt also *flie* and *flye*, *familie* and *familye*, etc.), only when words being spelt with final *i*, (ii) in Greek words, representing υ, as in *hymn*; (iii) before *i*, in inflexional forms of verbs ending in *y* or *se*, as *flying*, *lying*, *tying*, not *fliing*, etc.; (iv) in the plural of nouns ending in *y* preceded by another written vowel, as *boy boys*, *ray rays*, *alley alleys*, *money moneys* (but *monies* is still common, and *vallies*, *monkies*, etc. were equally so until recently). Particular usages, not falling under these categories, are the use of *y* to distinguish *dye* from *die*, and the fluctuation between *flyer* and *flier*, *tyre* and *tire*, *gipsy* and *gypsy*, *tiro* and *tyro*, *siphon* and *syphon*, *cipher* and *cypher*, *silva* and *sylva* (see each word for the special circumstances).

In some texts *y* is found substituted for *i* French *y* (dy), e. g. in Shoreham's Poems *manayour* is written for *manoure* = manger, in Ayenbite *ypoynted* for *poynt* joined, in the Camb. MS of the 15th century version of Guy of Warwick occur *yoye*, *yolye*, *yelouse*, *herbeyngoure*, *ioyeurmed* joy, jolly, jealous, harbinger, sojourned.

(2) About the middle of the 13th century *y* began to be used to represent the voiced palatal spirant (*y*), taking the place of the character ȝ (called Yogh, q. v.) in one of its values. ȝ is a loosely written form of OE. *g*, which had become appropriated in early ME. script to the guttural and palatal spirants, while the continental *g* was appropriated to the voiced guttural and palatal stops (though in some MSS. *g* stands for all these sounds: cf. G). The practice of contemporary scribes varied considerably, some restricting *y* to its vocalic use, others using it freely for both consonant and vowel. Northern scribes of the 14th and 15th centuries often write *yh* for *y* initially, as *yhit*, *yheyt* yet, *yher* year, *yhoung* young.

In many late ME. scripts ȝ became identical in form with *z*, and it was retained by Scottish printers in this form; e. g. printed *zer*, *fenzeit*, *Dalzeil*, represent *yer* year, *fenyeit* feigned, *Dalyeil* see further s. v. Z.

(3) Another value of *y* arises from the assimilation of *y* and *þ*, the runic *thorn* (see Th), which had become indistinguishable from each other in some MSS. of the early 13th century (e. g. the Cotton MS. of Cursor Mundi). After 1400 *þ* fell more and more out of use, and in some scripts was represented only by the *y*-form in the compendia *yᵉ*, *yᵗ* or *yᵗ*, *yᵗˢ*, *yᵐ*, *yⁿ* = the, that, they, them, thou, and the like, many of which continued to be extensively employed in manuscript in the 17th and 18th centuries. Two of these, *yᵉ* or *ȳ*, *yᵗ* or *ȳ*, were retained in printers' types during the 15th and 16th centuries, but often with a form of *y* somewhat different from that used in other positions (In the John Cheke's translation of the New Testament, a dotted *y* stands for *th*.) In manuscript (e.g. in letter-writing) *yᵉ* lasted well into the 19th century. It is still often used pseudo-archaically, jocularly, or vulgarly (pronounced as *ye*), e.g. in Lewis Carroll's 'Ye Carpette Knyghte', and in shop signs like 'Ye Olde Booke Shoppe'.

Y, obs. form of Eye, I *pron.*, In *prep.*

Y- *prefix* (1 3l-, 3o-, 3ø-, xio-, 3y-, 1–2 1o-, 2–3 3o-, 2–5 1-, hi-, 4–7 *dial.* ə-, 3– now *dial.* ə-, now *arch.* y-) represents OE. *ge-*, earlier (and Northumb.) *gi-*, = OFris. *gi-*, *ge-*, *ie-*, *e-*, *a-*, OS. *gi-*, *ge-*, *é-*, MLG., MDu. *ge-*, *ghi-*, locally *i-*, *y-*, *e-* (LG., Du. *ge-*), OHG. *ga-*, *ka-*, *gi-*, *ki-*, *ge-*, (MHG. *G-*, *ge-*, dial. *je-*, also *gi-*, *ga-*), Goth. *ga-* in– OTeut. **ga-*. The parallelism of formation and meaning exemplified by such forms as L. *communis* and Goth. *gamains*, OE. *gemǽne* common, I-mene, L. *convenīre* and Goth. *gaqiman* to assemble, L. *contiĕrn* and Goth. *gabaíhan* to be silent, L. *commemīnī* and Goth. *gamunan*, OE. *gemunan* to remember, L. *conferre* and Goth. *gabaíran* to compare, has suggested the probability of the etymological identity of Teut. *ga-* with L. *com-*, and some scholars have accepted this on the assumption that Verner's law operated in some instances of initial consonants. (L. *com-* is normally represented by *ham-* in OFrank. *hamēdii*, synonymous with OHG. *geido*, MHG. *geeide* conspirator.)

The original form *ga-* is the only one found in Gothic (e. g. *galeiks* Ylike); it was preserved also in OHG. (e. g. *galîh*), continued in MHG., and survives in a few words in some German dialects. The weakened (unstressed) form *gi-* was the prevailing one in OHG. and OS. and is the earliest form recorded in OFris. and OE., but it was early reduced to *ge-* in the whole of the Low German and High German area. In Scandinavian the prefix had disappeared entirely in prehistoric times as a living element, but relics of it remained in ON. *gilkr* Ylike, *gnógr* Enough, *greiðr* Graith *a.* (cf. Ready).

The phonetic changes of OE. *ge-*, resulting in its complete disappearance in modern English as a living formative except in certain dialects, are in general paralleled in most of the LG. (as opposed to the HG.) dialects. While in HG. the vowel of the prefix not uncommonly underwent syncopation, which has become permanent (to the obscuration of the origin) in certain words, as G. *gleich* (OHG. *ga-*, *gi-*, *galîh*) like (Ylike), *gnade* (OHG. *ginâda*, OS. *gināthia*, *nâthia*, Du. *genade*, ON. *náð*), in LG. dialects, on the other hand, there was a tendency for the consonant to fall, leaving *i-* or *e-*, in some dialects *a-*; e. g. OS. *unimetes* ' alliquid incommodum ', MLG. *ûtetene*, pa. pple. of *lēten* to permit, *medestelle* (cf. G. *mitgestell*) companion, *enanagh* enough, *eschein* (cf. G. *geschehen*) happened, MDu. *idaen* done, *idregen* drawn, *yslagen* slain, Du. dial. *ivallig* swek, OFris. *idein* done, *islein* slain, *onebunden* unbound, *enbch*, *anbch* enough, *unaborn* unborn, *ofeslain*, *ofaslain* killed off, EFris. *unikained* unkempt, NFris. *-enogh* (in comp.) enough. Complete suppression of the prefix takes place in certain cases, as in MLG. *to like* (cf. G. *ungleich*) immediately, LG. *lk* like, *nang* enough, *schein* happened, OFris. *bedda*, *sibb* companion, *fadera* godfather, *selscip* society, WFris. *mkch* adv. (beside *genbch* adj.-pron.), NFris. *mogh* enough; the suppression of the prefix is normal in pa. pples.; in words of other classes, it survives sporadically or has been revived through Du. or HG. influence.

The like developments of OE. *ge-* are traceable in the history of several words in which its identity and force have long ceased to be recognized, or from which all traces of the prefix have been obliterated: e. g. OE. *geforðiann*, ME. *forði(e)n*, *aforth*, Afford *v.*, OE. *gewer*, ME. *iwar(e*, *awar(e*, Aware *a.*, OE. *gelic(e*, ME. Ylike, Alike, Like *a.* and *adv.*, OE. *gemang*, *ongemang*, ME. Ymong, Among, Mong, OE. *genoh*, ME. *inoȝ*, *anoȝ*, Enough, *nuff*, OE. *handgeweore* Handiwork (whence, by analogy, Handicraft), OE. *ǽghwæðer* Either. For further examples of the complete disappearance of the prefix see below.

The gradual facts of the history and survival of OE. *ge-*, of which some details are given below, are:—In positions where it was still recognizable as a prefix, it had left few traces in northern English by 1200; its disappearance in the north was assisted by the absence of the prefix in ON. Substantival, adjectival, and verbal forms (other than pa. ples.) continued, not later than the end of the 14th century, only in southern and west-midland dialects. The pa. ple. was regularly formed with the prefix in southern ME. till about the middle of the 14th century, and its use in the form *a-* survives in south-western dialects to the present day. Pa. pples. so formed were a prominent feature of the archaistic language of Spenser and his imitators, and a few of them, the most notable of which is Yclept, persist as conventional archaisms of poetry.

In OE. and ME. the prefix was written either continuously with the body of the word of which it formed a part, or disjoined from it by a full or a half space; in the archaistic usage of the 16th and 17th centuries the general practice was to print the compound as one word, without hyphen. In this Dictionary established and well-known forms such as *yclad*, *yclept*, are printed without hyphen, but in other instances the convenience of the reader has been consulted, where occasion arises, in the avoidance of unhyphened forms where these would not suggest the nature of the word-formation.

Compounds of the prefix spelt with *y-* are entered in their alphabetical place, whether as full articles or as cross-references. Compounds which did not come down late enough for the spelling *y-* to have become established with them have been entered in their place in the letter I: see I-1. The choice of *y-* (and not *i-*) by Spenser and other archaists was determined by the prevalence of that form in the texts upon which he modelled his language. There are a few instances of the general survival of the *i-* form till a late date, e. g. I-free v.; the retention of *i-* in Iwis is due to the false etymologizing of it as *I wis*.

The original (physical) signification of the prefix, 'with', 'together', without admixture of transferred meaning, persists in some OE. words, such as *gedrag* lit. that which is drawn together, band, multitude (cf. Goth. *gadrogan* to heap up or together), *gelapian* to summon together, invite (cf. Goth. *galáþôn* συγκαλεῖν), *gerunnen* 'run together', coagulated (cf. Goth. *garinnan* to run together), *gefœdan* 'conjungere', to join together, connect; but for the most part its meaning in OE. compounds falls under one or other of the following categories, which are arranged in the probable order of their development in primitive Germanic: the notion of physical accompaniment or conjunction passing into that of (1) association in life, occupation, etc., and hence, of suitability or appropriateness, and (2) collectivity, the final stage being (3) a perfective or intensive notion evolved in some measure from each of the others.

1. The associative meaning is exemplified by two classes of words in OE.:

a. Designations of persons associated or related by birth, family, or status, such as *gebeddia* (I-bedde) 'one who shares a bed with another', bed-fellow, consort, f. *bedd* bed, *gefera* (Yfere, Fere *sb.*1) 'one who goes with another' (*faran* to go), companion, *gehdda* 'one of the same order as another', fellow-minister, f. *hád* condition, order, *gesíþ* (cf. Goth. *gasinþja*, OS. *gisíth*, OHG. *gisind*) 'one who shares a voyage with another', companion, f. *síþ* journey.

b. Adjectives and allied substantives denoting quality or condition, in which the purely associative sense readily passes into that of appropriateness, convenience, or similarity, such as *gecynd* (I-ounde *sb.*) nature, *gecynde* (I-cunde *a.*) natural, *gedéfe* (cf. Goth. *gadôbs*) becoming, fit, *gemǽc* well-matched, *gemæcca* companion, mate, Match *sb.*1, *gemæca* mate, Make *sb.*1, *gemet* lit. related in form to, of the same form as, Like *a.*, Ylike, *gemet* an equal, *gemet* sb., measure, proper measure, proportion, moderation, *gemet* adj., *gemǽte* lit. of suitable measure, fit, proper, Meet *a.*, *gerǽde* lit. suitably prepared (see I-rede, I-redy and Ready *a.*), *gestíbb* related, I-mib(be, *geswége* harmonious, *getrēowe* holding faith with, True.

2. Compounds in which *mutual* relation is implied form a link between the associative and the collective uses, e. g. OE. *gefán*, *geféond* (I-pfond) enemies, *gefrēond* (I-freond) friends, *gebróðor* (I-brotheren) brothers, *geswostor* sisters, *genéatas* kinsmen, *gesíp* pair of friends. The number of OE. words of purely collective meaning is not large; examples are *gelæcu* back parts, *gefylce* army, troop, *gemǽre*, pl. *gemǽru* limits, boundary, *getimbru* pl. building, edifice, *gewǽde* clothing, I-wede, *gewíder*, pl. *gewidru* weather (esp. as good or bad), storm cf. (t.. *gewitter*).

b. What is probably to be regarded as a particular development of the collective sense appears in the OE. generalizing pronouns and corresponding adverbs, *gehwá* every or each one (cf. I-whan), *gehwile* each or every one, ME. *i(ch*, Ilk, *gehá* somehow or other, *gehwær* everywhere, Ywhere, *gehwider* in any or every direction. Some of them were reinforced by the prefixing of *d* ever, e. g. *ǽghwá* each or every one, *ǽghwæðer* each of two, both, Either, *ǽghwelc*, ME. *euch* (see Each).

3. The perfective or intensive sense is found in the following classes of words:

a. Substantives denoting the result of an action, a stage in a process, or a particular state, as OE. *gemót* meeting, Moot *sb.*1, *gemynd* (cf. L. *commentum*) memory, remembrance, Mind *sb.*1, *gesíbb* relationship, *gesíhþ* I-sight, Sight, *geswell* swelling, Swell *sb.*, *geweorc* working, what is done or built, fortification, Work *sb.*, *gewitnes* testimony, I-witness, Witness *sb.*, *gewrit* what is written, writing, I-writ, Writ.

b. Adjectives denoting a state, as *geclǽne* pure, *gehál* Whole, *gesund* uninjured, Sound *a.*

c. Verbs which denote achievement of a result, the attainment of a stage in a process, or a special limitation of the general sense of the simple verb. The force of the prefix is clearly recognizable in examples like OE. *gecían* to eat up, consume, 'comedere', *gesítgan* to mount up, 'conscendere', and esp. in such pairs as *wrnan* to run, *gewrnan* to gain by running, *discan*, *frignan* to ask, *gedscian*, *gefrignan* to learn, *heran* to carry, *geheran* to bring forth, *faran* to go, *gefaran* to depart this life, die, to get by going, occupy, *rǽcan* to stretch forth, offer, *gerǽcan* to reach, obtain, *ridan* to ride, *geridan* to reach as by riding, get into one's power, *weorþan* to become, be, *geweorþan* impers. to be agreed, *gán* to go, *gegán* to attain to, get, occupy, *winnan* to fight, strive, *gewinnan* to win. But in many instances no difference of meaning is discernible between the simplex and the compound, e. g. *beorgan*, *geheorgan* to protect, *bdiorn*, *gebdiorn* to call, name, command, promise, *limpan*, *gelimpan* to happen, *secgan*, *gesecgan* to say, tell. There are also some causative compounds, as *gebítan* to make good, improve, Bete *v.*, *geforðian* to further (see Afford), *gehefigian* to make heavy. Of such verbs many did not survive except in their pa. ppples. into the ME. period; others survived only till about 1300, and that in southern areas; a certain

number, such as *gehleran* VERB, *gestéon* VERB, continued in use in present and past tenses till 1400 or later; very few lasted till 1500 or beyond. But from the middle of the 16th century onwards archaizing poets created (orig. after pa. ppl. forms) new formations in which the prefix was meaningless. Such are *yclept* (after *yclept*), *yglaunst*, and *ystirilled* (Spenser), *scharm'd*, *yspromt* (Robinson's *Mary Magdalene*), *ystert* (Grosson), *ystrop* (Henry More); there are also pres. pples. like Sackville's *yeausing* and Milton's *star-ypointing*.

4. The use of perfective or completive *ge-* had its most extensive development in the formation of pa. pples., a function common to the Low German and High German groups but not found in Gothic and Scandinavian. The prefix could be employed with any uncompounded verb, but the verbs corresp. to OE. *bringan* to bring, *cuman* to come, *findan* to find, *weorþan* to become, did not normally take it.

In OE. and in ME. (where the prefix continued in full use) it is often impossible to determine whether a particular pa. pple. with *ge-* (*i-*, *y-*) belongs to a simple verb or to its compound with *ge-*.

In OE. the prefix was employed in forms derived from Latin, as *geplantod* = *plantatus*. Similarly in ME. it was freely employed with verbs of French origin, as *yblaptised*, *yblamed*, *ycircumcysed*, *iclosed*, *igranted*, *ikupled*, *ymaried*, *yoccupied*, *ipaied*, *ipassed*, *irobbed*, *isturbed*, *iused*, *ivoteined*, *iwarried*. Early loanwords from Scandinavian also took it, as *itaken* (12th cent.).

It came down into ME. as a peculiar characteristic of the language of the south and west-midland regions, and examples are consequently abundant in such texts as (in the 13th cent.) Layamon's Brut, the texts of 'the Katherine group', Owl and Nightingale, Robert of Gloucester, (in the 14th cent.) Ayenbite, Shoreham's poems, Piers Plowman, Trevisa's works, Sir Ferumbras, (in the 15th cent.) Yonge's translation (Anglo-Irish) of Secreta Secretorum and the anonymous Two Cookery Books (E. E. T. S.); its frequency in Lydgate is presumably due to metrical exigencies and to imitation of Chaucer, in whom it is fairly common, whereas it is almost entirely absent from the works of Gower. In the 16th century it was adopted as an archaistic feature from Chaucer and Lydgate by many poetical writers, among whom are Phaer, Sylvester, Arthur Hall, and, above all, Spenser. In the 17th cent. Henry More is a prominent user of these pa. pples., and in the 18th cent. Thomson and other Spenserians have many examples. Some of the most commonly occurring words are *ybent*, *ybound*, *ybrought*, *yclad*, *yclept*, *ydight*, *ydrad*, *ydent*, *yfight*, *yworought*.

In modern dialects its use in the form *a* (*ə*) extends over a triangular area of which the angles lie in Worcestershire, Surrey, and Cornwall; it is found also in Pembrokeshire and Wexford. Modern examples of dialectal usage are :—

1568 HOWELL *Arbor of Amitie* 34 b, In husbandry, icham truely, ycounted to excell. 1603 *London Prodigal* iv. i. E 3 b, Such a lerripoope as thick ych was nere yfarued. *c* 1620 JOHN SMITH *Descr. 5. In OE. *ge-* was used in the formation of adjs. from substantival stems to express the possession of, or being provided with, something, as *gefeax* having hair (of a certain colour), *gehcort* courageous, *gestence* odorous, *gewurms* purulent (f. *wurms* corruption; cf. Goth. *gasôhs* shod), but esp. with the ppl. ending *-od*, *-ed*, as *gefeaxod* (beside *gefeaxen*) having hair, *gehelmod*, *gehilmed* helmeted, *gehyrnd* horned, *gesperod* armed with a spear. The number of the latter was added to in ME., e. g. *yhonchyd* humped, (*wel*) *ychirped* well-favoured, *yfetlered* (cf. OE. *gefetherian*), *ylcaded*, *ylellered*, *ypawlyoumed*, *yteiled*, (*old*) *i-yeerid* ; in some instances the forms with the prefix are the more original forms of such adjs. : see e. g. FEATHERED, LEADED, LEATHERED, TAILED, YEARED. A few compounds of this class were coined by archaists of the 16th century : e. g. *ycrested* (A. Hall, 1581).

-y *suffix* 1 (Forms: 1 **-ig**, 2–5 **-i**, 4–6 **-ye**, 4–7 **-ie**, **-e**, **-y**, 6– now only in certain cases **-ey**), descending from the OE. adj. suffix *-ig*, which represents under a common form two OTeut. suffixes **-îga-*, *-aga-*, still distinguishable in OE. by the presence or absence respectively of mutation of the stem vowel of the sb. to which it is added, e. g. *mâdig* MOODY :— **môdaga-*, f. **môda-* MOOD *sb.*1, *mihtig* MIGHTY :— **mahtîga-*, f. **mahtîn* MIGHT, *stânig* STONY beside *stânig*, *þurstig* beside *þyrstig* THIRSTY.

OTeut. **-îga-*, *-aga-* are differentiated forms of Indo-eur. *-qo-* (Skr. *-akâ-*, Gr. *-κος*, L. *-cus*) arising from application of the suffix to *i-* and *a-* stems respectively. In other Teut. languages the following forms are found : OFris. *-ig*, OS. *-ig*, (MDu. *-ich*, Du. *-ig*), OHG. *-ig* (MHG. *-ic*, *-ec*, *-ec*, G. *-ig*), ON. *-igr*, Goth. *-eigs*, *-igs* ; OS. *-ag*, OHG. *-ag*, *-ah*, ON. *-agr*, Goth. *-ags*, *-ahs* ; also OHG. *-ah*, ON. *-ugr*, Goth. *-ugs*.

When the suffix is appended to a sb. ending in *y*, the convention of modern spelling requires it to be spelt *-ey*, as in *clayey*, *skyey*, *wheyey*. When the sb. ends in *-e* preceded by a vowel, the *e* is retained, as *bluey*, *gluey* ; in other cases there may be variation, as *homey*, *howy*, *liney*, *liny*, *nosey*, *nozy*.

1. The general sense of this suffix is 'having the qualities of' or 'full of' that which is denoted by the sb. to which it is added, as *icy* = (1) of the nature of, having the appearance, hardness, coldness, slipperiness, transparency, etc. of ice ; (2) full of or filled with ice. In OE. there are a very large number of such adjs., many of which have a continuous history from the earliest times to the present day ; in the case of some, however, e. g. *clayey*, *icy*, *rainy*, *wintry*, there is a significant gap in the evidence, which suggests that they may have dropped out of use and have been formed afresh later. There are some noteworthy instances of new formations in late OE., e. g. *dohtig* DOUGHTY replacing *dyhtig*, *dihtig* DUETY, *snduig* SNOWY replacing *snâwihte*. To several OE. adjs. in *-ig* there were parallel formations in *-iht*, as *ísig*, *ísiht* icy, *sandig*, *sandiht* sandy, *þornig*, *þorniht* and *þyrniht* thorny ; the disappearance of this latter suffix left freer scope of development for the forms in *-ig*.

In ME. the number of these derivatives does not seem to have been at first greatly increased ; the following fresh coinages are exemplified first from texts before 1300, *dreadly*, *fiery*, *frighty*, *hairy* (cf. OE. *hæriht*), *happy*, *needy*, *sleepy* (but cf. OE. *unslâpiht* *sb.* *unrest* (*c* 1150 = in good condition) ; there are occasional parasynthetic compounds, as *sortlessi* short-lived. The addition of the suffix to non-native sbs. is at least as early as the 13th cent., e. g. *savoury* in the Ancren Riwle. The fourteenth cent., esp. the later half, was prolific in new formations ; to this period belong *angry*, *bushy*, *earthy*, *fatty*, *flowery*, *heady*, *hearty*, *milky*, *misty*, *mouldy*, *mucky*, *naughty*, *smoky*, *sweaty*, and many more. The nineteenth cent. was also a prolific period ; to it belong, e. g., *cottony*, *frothy*, *dirty*, *healthy*, *leafy* (but *leavy* is 15th cent.), *mealy*, *saucy*, *sugary*, *vinny*, *woolly*, *yeasty*. Others, such as *bulky*, *meatly*, *noisy* (Dryden), *peppery*, *racy*, *showy* are recorded first from the 17th cent.

Later new derivatives tend in a large measure to be colloquial, undignified, or trivial, as *bumpy*, *dumpy*, *flighty*, *hammy*, *linsey*, *loopy*, *lumpy*, *lungy*, *messy*, *oniony*, *treey*, *verminy*, *vipery* ; some are from verbs, as *dangly*. Contextually, the application of this suffix may be narrowed in any direction, as *mousy* = (1) resembling a mouse, (2) quiet as a mouse, or (3) infested with mice. A sense 'addicted to' (cf. 3), as in *booky*, *doggy*, *horsy*, is of modern growth.

1850 THACKERAY *Contrib. to Punch* Wks. 1900 VI. 163 Citizen Lund brought me an oniony knife to cut the bread. 1859 MRS. WHITNEY *We Girls* ii, Bedsteads and washstands and bureaus—the very things that made up-stairs look so very bedroomy. 1891 M. MUSIEL DOWIE *Girl in Kerp.* xi. 74 Fretwork brackets and crystal fittings.

2. In the 15th cent., if not earlier, certain monosyllabic adjs. were extended by means of this suffix, app. with the design of giving them a more adjectival appearance, e. g. *hugy* f. *huge*, *leany* f. *lean*. The majority of such words arose in the 16th and 17th cent. ; examples are : *bleaky*, *chilly*, *cooly*, *dusky*, *faintly*, *haughty*, *hoary*, *lanky*, *palyard*, *plumpy*, *slighty*, *slippery*, *stouty*, *swarthy*, *thicky*, *vasty*. In this application the suffix has not infrequently come to express much the same notion as *-ish* ; this is particularly so with colour-epithets, as *blacky*, *yellowy*, and esp. when these are used quasi-advbs., as *greeny-blue*, *bluey-green*, *reddy-brown*.

3. As early as the 13th c. this suffix began to be used with verb-stems to express the meaning 'inclined or apt to' do something, or 'giving occasion to' a certain action ; in the Ancren Riwle alone we have *slibbri*, *sliddri*, *stugri*, *stummi*. Chaucer has *sleepy* = soporific. In the 16th cent. arose *choky*, *drowsy*, *slippy*, *sticky* ; later we find *blowzy*, *clingy*, *floaty*, *quavery*, *rollicky*. The immediate etymon of such adjs. cannot always be ascertained.

4. From the early years of the 19th cent. the suffix has been used still more freely in nonce-words designed to connote such characteristics of a person or thing as call for condemnation, ridicule, or contempt ; hence such adjs. as *beery*, *catty*, *churchy*, *jumpy*, *newspapery*, *peggy*, *tinny*.

-y *suffix* 2 (1–3 **-ian**, **-ean**, **-in**, 2–4 **-ien**, **-ie**, 3 **-igen**, **-egen**, **-ye(n**, **-ie**, 3–4 4–5 **-ey**, 5–6 **-ye**, 3–**-y**) represents OE. infin. ending *-an* of the 2nd class of weak verbs (having pa. t. in *-ode* and pa. pple. in *-od*), corresp. to OFris. *-ia*, OS. *-ôian*, *-ôn*, (MLG., MDu. *-ên*), OHG. *-ôn* (MHG., G. *-en*), Goth. *-ôn* :— OTeut. **-ôjan*. This class of verbs is denominative ; e. g. OE. *sealfian* to anoint :— **salbôjan*, f. **salbô* ointment, salve, *hearpian* to harp, f. *hearp* harp, and contains many intrans. verbs derived from adjs., e. g. *cêlian* to be cool (= OS. *côlôn*) :— **kôlôjan*, f. **kôlus* cool, *nearwian* to be narrow, f. *nearu* narrow ; it was swollen in prehistoric OE. by the passing over to it of many verbs that orig. belonged to the *-âjan* class, as *hâtian* :— **hâtôjan*, *-âjan* to hate (cf. OHG. *haʒʒôn* beside *haʒʒên*). Adoptions of foreign verbs were regularly taken into this class, e. g. OE. *fersian* to versify, (*ge*)*temprian* to moderate, *offrian* to sacrifice.

By the 13th century this suffix had become restricted to the southern and western districts of England, and in the course of the century became generalized in those parts as the infin. ending of all verbs of whatever origin. The following are some examples of the extension of its use : in verbs orig. belonging to other conjugations, *brukien* (OE. *brûcan*) to enjoy, *nemni* (OE. *nemnan*) to name (Layamon) ; in new derivatives on native stems, *chaffari* to chaffer (Ayenbite), *grundien* to sink (Layamon), *knistri* to knight (King Horn) ; in verbs from Scandinavian, *tastin* (ON. *lasta*) to blame, *trosti* (Ayenbite) ; in verbs from French, not only those in *-ier*, *-ir*, *-ire* (the similarity of which to the ME. suffix would naturally suggest adoption into the *-ien* conjugation), *boili* (OF. *boillir*) to boil, *consenti* (OF. *consentir*), *herberʒi* (OF. *herbergier*) to harbour, *sasi* (OF. *saisir*) to seize, *treiy* (OF. *traitiier*) to treat—including those of the *-ist-* conjugation, *norisi*, *norischa* (OF. *norriss-*) to nourish, *perisy* (OF. *perisс-*) to perish —but many also of other classes, *anuri* (OF. *anourer*) to worship, *fausie* (OF. *fauser*) to fail, *granti* (AF. *graunter*) to grant, *ioyni* (OF. *ioign-*) to join, *tempti* (OF. *tempter*) to tempt (these forms occur in various texts from Layamon to Ayenbite).

This suffix has been in continuous use in the south-west until the present day, when it is the regular infin. ending of verbs when used intrans. in the counties of Somerset, Devon, and Dorset. Examples and illustrations since 1400 are :—

c 1430 *Two Cookery-bks.* 7 Gadere alle þe kreme in þe clothe, an let hongy on an pyn. *Ibid.* 21 Take Porke or Beef, whether þo lykey. 1484 *Statut. Churchm. Acc.* (Som. Rec. Soc.) 113 To cause to tryly the Chirch that waste ystole xiij*d*. 1746 *Exmoor Scolding* (E. D. S.) 143 Thes wut rackee, and squattee, and doattee in the Chimley Coander lick an Aswaddle. 1863 BARNES *Dorset Dial. W. Enq.* 7 Another peculiarity is that of attaching to many of the common verbs in the infinitive mode, as well as to some other parts of different conjugations, the letter *y*. Thus it is very common to say *I can't sewy*, *I can't nurvy*, *he can't reapy*, *he can't sowy* ; as well as *to sewy*, *to nurvy*, *to reapy*, *to sowy*, &c. but never, I think, without an auxiliary verb, or the sign of the infinitive *to*. 1869 BARNES *Dorset Dial.* 28 The truth is, that in the Dorset the verb takes *y* only when it is absolute, and never with an accusative case. We may say, 'Can ye sewy ?' but never 'Will ye sewy up bedaes zeam ?' 'Will ye zew up theäse zeam ?' would be good Dorset. Belonging to this use of the free infinitive *y*-ended verbs, is another kindred use, the noting of a repetition or habit of the action, as 'How the dog do jumpy,' i. e. keep jumping. 'The child do like to whippy,' amuse himself with whipping. 'I do like to chasy, Ma'ty do like to hidy, (speak his time in fishing,) if you do leäve en alwone.' 'He do markety.' He attends market.

-y *suffix* 3 (also 3–7 **-ie**, 4–6 **-ye**) represents ultimately, through F. *-ie*, Com. Romanic *-ia* = L. *-ia*, which comprised under one graphic form the Greek suffixes *-ia* and *-εια*, as in L. *mania* = Gr. *μανία*, whence F. *manie*, ME. MANIE, L. *sympathia* = Gr. *συμπάθεια*, whence F. *sympathie*, Eng. SYMPATHY. Romanic *-ia* displaced L. *-tia* and became a living formative for abstract nouns of quality or condition ; e. g. in OF. from *corteis* (COURTEOUS) was formed *corteisie* COURTESY, from *fol* (FOOL), *folie* FOLLY, from *gelos* (JEALOUS), *gelosie* JEALOUSY, and the like. When learned adoptions were made of L. nouns in *-tia*, this suffix was also represented by *-ie*, and so assimilated to *-ia* ; e. g. F. *furie* FURY, ad. L. *furia* (whence also organic

OF. *futre*). In AF. preference was given to such forms as these over popular or semi-popular forms, e.g. AF. *accidie, gloria, estoria, victorie* = central F. *accide, gloire, estoire, victoire*, L. or med.L. *accidia, gloria, historia* (Gr. ἱστορία), *victōria*; it is the AF. forms of such words that were adopted into English (see ACCIDIA, GLORY, STORY, VICTORY).

There were various new formations in late or med.L., in Romanic, or in individual Romance languages; examples are Romanic **librārīa* LIBRARY, **poestía* (for *poestz*) POESY, OF. *navie* NAVY.

This suffix has never been in English a prolific formative, but from time to time new coinages have been made, e.g. in the 14th cent. *beggerie* BEGGARY and in the 16th COOPERY (= cooper's work or ware), f. *beggar* and *cooper*, both doubtless furthered by the prevalence of the suffix -ERY. Nonce-words like *orphanry* and *tenancy* are of doubtful status, but the correspondence of Pndjs. in *-ic* and *-out* to sbs. in *-y* has made possible in modern times the formation after Gr. types of such words as *brachycephaly, gymnospermy, synchrony, syntony* from *brachycephalic, gymnospermous, synchronous, syntonic*. The domain of the suffix is much enlarged by its constituting the final element of many compound suffixes, which receive separate treatment in this Dictionary in their alphabetical places; e.g. -ACY, -ORY, -ERY, -GRAPHY, -LATRY, -LOGY, -MACHY, -PATHY, -PHAGY, -PHILY, -RY, -TOMY, -TONY.

Many important sbs. having this suffix appear as English adoptions of French words in the 13th century, as *barony, blasphemy, company, courtesy, felony, folly, jealousy, litany, story, villainy*; others, such as *comedy* and *tragedy, fury, glory, harmony, honesty, library, melancholy, memory, misery, navy, victory* date from the 14th century; in the 15th and 16th centuries another series of borrowings from French or from Latin appears, such as *family, industry, irony, liturgy, modesty*.

The majority denote a state, condition, or quality; others denote an activity or a result of it, as *blasphemy, felony, fury, harmony, history, liturgy, memory, phantasy, poesy, victory*. From either signification a definitely concrete meaning may be readily developed, which is found in *barony* (= baronial domain, body of barons), *company, family, library, navy, victory*, etc. The concrete application is abundantly illustrated also by names of countries, as †*Armony* (Armenia), *Italy*, †*Syrie* (Syria), *Brittany*; cf. -IA *suffix* 1.

-y *suffix* [4], representing, first through AF. forms in *-ie*, later by direct adaptation, L. *-ium*, which was added to verbal roots (primarily *i-* and *e*-stems) to denote an act, as in *beneficium* well-doing, good action, f. *benefic-e* to do good, *colloquium* conference, conversation, f. *colloqu-i* to speak with, *gaudium* joy, f. *gaudēr-e* to rejoice, *suspirium* sigh, f. *suspīrāre* to sigh. The earliest derivatives of this formation that were introduced into English are *remedy* (Ancren Riwle), through AF. *remedie*, from L. *remedium*, and †*sacrilegy* (early 14th c.), from AF. **sacrilegie* or L. *sacrilegium*. To both of these there are parallel forms, †*remede* and *sacrilege*, derived from continental Fr. forms *remede* and *sacrilege*; there are several similar pairs, of which the shorter form represents a continental Fr. form, the longer the corresponding AF. form or the orig. Latin, viz. †*augure* and *augury, benefice* and †*beneficie* (rare), †*colloque* and *colloquy, empire* (F. *empire*) and †*empery* (AF. *emperie*, L. *imperium*), *homicide* sb.[2] and †*homicidie* (rare), †*perjure* sb.[2] (rare) and *perjury*, †*subside* (*c* 1450–1553) and *subsidy*; †*ingeny* 'mind', 'intellect' has its etymological doublet in *engine* 'native talent, genius, ingenuity, mechanical contrivance'. Most of these words, together with *obloquy*, came into the language before 1500. †*Relevy* sb.[1] (med. L. *relevium*) and *suspiry* (L. *suspirium*) are rarities; *gaudy*, though partly from L. *gaudium*, is prob. of mixed origin; the derivation of *larceny* is somewhat obscure. *Horology*[1] (beside *horologe*) and *mystery*[1] are derived, through the medium of L. *-ium*, from Greek forms having the cognate termination *-ον*.

This cannot be said to have been at any time a living suffix in Eng., but there appears to have been reminiscence of its function, combined with the false analogy of words in -RY, in the coining of a few nouns from verbs ending in an *r*-sound, viz. *enquery* (*c* 1440), *inquery, inquiry* (16th c.), f. *enquere, inquire, expiry* (from 1752) f. *expire*, and a rare *transpiry* f. *transpire*. *Entreaty* (16th c.) is f. *entreat* vb. on the analogy of *treat, treaty*.

-y *suffix* [5], representing AF., OF. *-e, -ee*, mod.F. *-é, -ée* :— L. *-ātu-, -āta-* (see -ATE[1], -ATE[2]).

a. In sbs. = -ATE[1], as in (i) COUNTY[1], OF. *counte*, F. *comté*, L. *comitātus*, f. *comit-, comes* count, DUCHY, F. *duché*, L. *ducātus*, f. *duc-, dux* duke, TREATY, F. *traité*, L. *tractātus*, f. *tractāre* to treat, (ii) ARMY, F. *armée*, Romanic **armāta* armed force, f. *armāre* to arm, DELIVERY, AF. *delivree*, ppl. sb. f. *delivrer* to deliver, ENTRY, F. *entrée*, Romanic **intrāta*, f. *intrāre* to enter.

This suffix is represented under other forms in certain words, e.g. *assignee, committee, refugee* (F. *assigné, commis, refugié*), *attorney* (OF. *atorné*), *alley, journey, valley* (F. *allée, journée, vallée*).

b. In adjs. = -ATE[2], as in *easy*, OF. *aisié* (F. *aisé*), L. *aisier* to ease. There are few general adjs. of this kind, but there is a considerable number of heraldic descriptive terms having this termination, the earliest example of which is *ferowndy* (14th cent.), *gernundi* (1486), GYRONNY, a. OF. *geronné, gironné*, f. *giron* GYRON. Early adoptions of this class have the ending *-e*, later *-ee*, and (as early as the Book of St. Albans, 1486) often *-i*, later *-y*. With some, *-y* has become the regular form, as *barry, bendy, fretty, fusilly, gyronny, lozenny, nowy, paly* adj.[2], *sarcelly*; others are found commonly with either *-i*, *-ie*, *-ee*, or *-y*, as *bolonde(-e, -y, checky, chequee, nebulé, -y, tenné, -y, vendilé, -y, vendy*; others, of more modern introduction, usually retain the French spelling, as *coupé, dancettée* (cf. † *dancy*), *écartelé, renversé, semé*; some have been anglicized with the native ppl. suffix, either temporarily or permanently, as †*besantid* (= *besanty*), *escarteled, paled* ppl. adj.[1], *resarcelled, sarcelled*. In *wavy* (after *undy*) we have a rare instance of an analogical use of the suffix with a sb. of native origin.

-y *suffix* [6] **-ie** (also 7–8 *-ee*, 7– *-ey*), used to form pet names and familiar diminutives. The forms *-y* and *-ie* are now almost equally common in proper names as such, but in a few instances one or other spelling is preferred, as *Annie, Betty, Sally* (rather than *Anny, Bettie, Sallie*); in the transferred applications of these, as *jemmy, tommy, dicky*, and the like, *-y* prevails; in general hypocoristic forms *-ie* is the favourite spelling after Scottish usage, as *dearie, mousie*. The use of *-ey* is subject to the same rules as for *-y suffix* [1].

The use of this suffix in pet forms of proper names is found in Sc. as early as 1400; and in the 15th and 16th centuries instances become frequent; examples are *Cryste, Cristi* (f. *Cristin, Cristian*), *Pery* (f. *Pere* Peter), *Sandy* (f. *Sandre* for *Alisandre* Alexander), *Jamy* (f. *James*), *Michy* (f. *Michel*), *Richy* (f. *Richard*), *Roby* (f. *Robert*), *Edi* (f. *Ede, Ade* Adam), *Anny* (f. *Anne*), *Bessy* (f. *Elizabeth*). Such names were prob. modelled orig. upon forms like *Jenny, Murphy* = OF. *Jeanet, Murfé*), which have the appearance of being pet forms of *David, Mathon*. (Many have survived in Sc. surnames, as *Christie, Eadie, Pirrie, Ritchie, Christison, Mathieson, Robison*; *Davy* occurs as a surname in English use in the early 14th cent.)

The formation was greatly extended in Scottish and English use; whence *Annie*, BILLY, *Carrie* (f. *Caroline*), CHARLIE OR CHARLEY, *Fanny* (f. *Frances*), JANEY, JENNY, JIMMY, JOHNNY, NANNY, *Nellie* (f. *Ellen*), PATTY, *Reggie* (f. *Reginald*), TOMMY, *Willie*. Many female names have corresponding forms in Du. names with the suffix *-je*, as in *Antje* little house, f. *huis* HOUSE sb.[1]; e.g. *Betty, Elsie, Hetty, Katy, Lottie, Maity, Sally* correspond to Du. *Betje, Elsje, Jetje, Kaatje, Lotje, Matje, Sellie*; but there is no evidence of historical contact.

The earliest recorded instances of the use of such proper names as appellatives are Scottish and belong to the beginning of the 16th century: viz. *Lowrie* (f. *Lowrence* Laurence) used for 'fox'; *Katy* and *Kitty* (f. *Katherine*), with the meaning 'lass, wench', tending to a specifically depreciatory sense, 'wanton, loose woman', which senses belong also to the 18th century *Molly* and *Nanny* (as in *Nanny-house* brothel); a few female names, viz. *Molly* and (dialectally) *Peggy*, have been used to designate an effeminate type of man.

The application of the female names to birds dates, according to our evidence, from the close of the 16th century; the wren is designated by *Kitty* and (more commonly) *Jenny*; in 1616 Ben Jonson calls a parrot *Polly*; in modern dialects *Peggy* is applied to various warblers and the pied wagtail, and *Betty* to the hedge-sparrow. Then, in the course of the 17th century, these names came to be applied to various mechanical contrivances, among which machines for spinning processes and the burglar's jemmy are prominent. This transference of application is illustrated by *Betty* (a burglar's jemmy, 1700), *Jenny* (in SPINNING-JENNY, 1783), *Jinny* (a stationary engine at a mine), *Peggy* (a washing-tub dolly, in various dialects).

Among male names the following are typical: *Johnny* is used for fellow, chap, *Jemmy* for the burglar's weapon, *Billy* for a roving machine; *Bobby, Charley, Dicky, Georgie, Jacky, Jockey, Tommy* exhibit a great variety of modes of application.

The first known instance of the application of the suffix to a common noun is LADDIE which appears in 1546 in the form *laddy*, used by John Bale; but there is no evidence until the 18th century of the generalization of *-y* for pet diminutives. Early instances are *dummie* (1595), *grannie* (1663), *dearie* (1681), *mousie* (1693, Sc.); *laddie, lassie*, and *sweetie* were used by Allan Ramsay, and these, with Burns's *birdie* and *mousie*, helped to popularize such formations in English generally; hence the appearance in the late 18th and early 19th century of *cooky, doggie, froggy, mannie, stawey*. In *blacky* and *darky* = 'nigger' there remains something of the status of a proper name; cf. *Patty* as a nickname. *Bookie* for *bookmaker* is a formation of a rare type; cf. *nighty* for *nightdress*.

1885 *Eng. Illustr. Mag.* Apr. 509/2 No rowdy ring, but a few quiet and well-known 'bookies', who were ready enough to lay the odds to a modest fiver.

There are two words that are generally held to contain this suffix, viz. *baby* (late 14th c.) and *puppy* (late 15th c.). With *baby* may perhaps be coupled *daddy* and *mammy*, although the evidence for these is not earlier than the 16th century; the pairs *babe* and *baby, dad* and *daddy, mam* and *mammy*, may have resulted from different phonetic reductions of original reduplicated forms **baba* (cf. BABAU), **dada*, **mama*. The source of *puppy* (spelt *popi* in the Ilk. St. Albans) is doubtful; *pup* is a back-formation from it.

Yankee (yæ·nki), *sb.* and *a.* Also 8–9 **Yankey, Yanky, pl. Yankies.** [Source unascertained.

The two earliest statements as to its origin were published in 1789: Thomas Anburey, a British officer who served under Burgoyne in the War of Independence, in *Travels* II. 51 so derives *Yankee* from Cherokee *eankhee* slave, coward, which he says was applied to the inhabitants of New England by the Virginians, and usually contrasted them in the Cherokees; William Gordon in *Hist. Amer. War* states that it was a favourite word with farmer Jonathan Hastings of Cambridge, Mass., *c* 1713, who used it in the sense of 'excellent'. Appearing next in order of date (1822) is the statement which has been most widely accepted, viz. that the word has been evolved from North American Indian corruptions of the word *English* through *Yengees* to *Yankees* (Heckewelder, *Indian Nations* iii. cd. 1876, p. 77): cf. Yengee.

Perhaps the most plausible conjecture is that it comes from Du. *Janke*, dim. of *Jan* John, applied as a derisive nickname by either Dutch or English in the New England states (*N. & Q.* 1st Ser. VII. 536, in *Life of Tecumseh* 1876, II. vii. 244). The existence of *Yankéy, Yankee*, as a surname or nickname (often with Dutch associations) is vouched for by the following references:

1683 *Cal. St. Papers, Colon. Ser.* (1898) 437 They [*sc.* pirates] sailed from Bonaco..; chief commanders, Vanhorn, Laurens, and Yankey Duch. 1684 *Ibid.* 733 A sloop..unlawfully seized by Captain Yankey. 1686 *Ibid.* (1899) 436 Captains John Williams (Yankey) and Jacob Everson [Jacobs, 1687-8 *MSS. Yard (yāɹd), *sb.*1 Forms: 1 geard, 4–5 3ard(e, 4–8 yard, 4–9 yaird, (4 3herd, 5 3eard, 3ord, yorde, 6 yharde, 7 yeard, 8 *Sc.* yeard), 5–6 3aird, 6–7 yerde, 3– yard. [OE. *geard* str. masc. fence, dwelling, enclosure. In OE. *geard* enclosure, dwelling, Du. *Tuin*, *gaard* garden, OHG. *gart* circle, ring, ON. *garðr* Garth, (Sw. *gård* yard, Da. *gaard* yard, farm), Goth. *gards* house, with corresp. wk. forms OFris. *garda* garden, OS. *gardo*, OHG. *garto* (MHG. *garte*, G. *garten*) garden, Goth. *gards* enclosure, stall. (OE. *geard* is the second element of *middangeard* Middenerd, *ortgeard* Orchard, *wingeard* Wintarn.)

The ulterior relations of these words are uncertain. Close affinity of sense is exhibited by the words derived from the Teut. root *gerd-*: *gard-*, represented by Gaul. γ-ιτο-, Lat. *-erno*, (OHG. *zurten*, G. *gerte*) and Gothic *at-* (ON. *Gipr*), Goth. *gairdan*, and those derived from an Indo-European root *ghorti-*, viz. Gr. χόρτος farm-yard, feeding-place, food, fodder, L. *hortus* garden, *co-hort* enclosure, yard, pen for cattle and poultry, Cornet, Court, Olr. *gort* cornfield; but there are phonological difficulties in the way of equating both groups of words. (OSl. *gradŭ* enclosure, town, Russ. гдадъ, родъ, town, as in *Petrograd*, *Novgorod*, Lith. *gardas* hurdle, fold, are prob. borrowed from Teutonic.)

The general signification of the word is 'enclosure', the particular character of which is usually to be inferred from the context; the simple word in this often felt to be short for a specific compound of it (see references in the various senses.)

For the declension of the 2nd pers. pron. in OE. and ME. see Thou.

In the earliest periods of English *ye* was restricted to the nom. pl. In the 13th c. it came to be used as a nom. sing. = ‘thou’, first as a respectful form addressed to a superior. This use survives in modern dialects, esp. (in the form *ee*) in interrog. and imperative forms after *to do* v., but also in objective uses = ‘thee’ (e. g. *Ot tell ee*). When *you* had usurped the place of *ye* as a nom., *ye* came to be used (in the 15th c.), vice versa, as an objective sing. and pl. (= ‘thee’ and ‘you’).]

Now (in all uses) only *dial.*, *arch.*, or *poet.*; in ordinary use replaced by You.

OE. (WS.) *gēa* combined with the corresp. Anglian *gē* to produce the ME. type *ȝe(e*, *ye(e* ; the Northumb. development of the Anglian form, *gē*, *gī* (cf. Northumb. **sclep*, *srīp* = WS. *sclæp* Sheep), gave a ME. type *ȝi*, continued in mod. north. dial. in *yi*, *yigh*, *yoi*. In later WS. the falling diphthong of *gēa* became a rising one, *ged*, *id*, whence arose some such forms as *ȝeah* northern *ȝa* (but cf. *ȝeȝ*). In other respects the phonology of the English forms is obscure. The modern standard spelling *yea* and pronunciation (*yē*) show arrested development of the vowel, but the pronunciation (*yī*) is current locally. ME. *ȝei*, *ȝeȝ*, *ȝeyȝe* seem to point back to a doubled form **ȝeȝe*. The e-forms *ȝai*, *ȝoi* constitute a distinct southern type, with possibly a modern representative in Hampshire *yigh*.]

A word used to express affirmation or assent : now ordinarily replaced by Yes.

1. As simple affirmative, in answer to a question not involving a negative : = Yes I.

For the distinction formerly observed between *yea* and *yes*, see Nay *adv.* 1 and Yes 2.

In ME. *ȝe* is sometimes accompanied by a pronoun repeating the pronominal subj. of the question (see quots. from *Ancr. Riwle*, a 1225, and cf. the first quot. from the same text in 3 *β*).

Besides these forms there is a type represented by OE. *clodhamer* (coupled with *feldeware*) 'scorellus', of doubtful formation (? corruption of **goldhamer*) and MHG. *hamere*, *golthamere* 'amarellus'. The origin and identity of *hamer*, *-ere* are uncertain; but connexion with or assimilation to OE. *hama*, OHG. *-hamo* covering, skin, feathers (Germ. Name) is improbable, and the form Yellow-ham, which may go back to an OE. type **grolo-hama* the yellow-feathered bird, gives support to the hypothesis.

Both forms *-hammer* and *-ammer* are historically justifiable; Yarrell's proposed rejection of *-hammer* (see *British Birds*, 1843, I. 246) is based on insufficient evidence.

The bird has many local names into which the word *yellow* or *gold* enters, viz. The acceptance of this derivation necessitates the assumption that *yea* was orig. available as an answer to a particular class of question, which is intrinsically not improbable. The suggested derivation from **gea swa* 'yea, so' is phonologically inadequate

The pronunciation (yes), still widespread in dialects, was formerly current in polite speech and is recorded as such in Walker's *Pronouncing Dict*.]

A word used to express an affirmative reply to a question, statement, command, etc.

1. In answer to a question not involving a negative; standing for the affirmative sentence corresponding to the interrogative one constituting the question = 'It is so.' Phr *To say yes* to assent, comply; *spec* to accept a proposal of marriage.

Formerly usually more emphatic than *yea* or *aye* in later use taking the place of these as the ordinary affirmative particle of 2 below

2 a In answer to a question involving a negative.

Formerly regularly used thus (and as in b) in distinction from *yea* (see YEA 1); the distinction became obsolete soon after 1600, and since then *yes* has been the ordinary affirmative particle in reply to any question positive or negative, and *yea* has become archaic. The distinction was still observed in the Bible of 1611, in which *yes* occurs four times (all in N T.), always after a negative question or statement: the Revisers of 1881, apparently in ignorance of the usage, have altered it in all these instances to *yea*.

2 a In answer to a question involving a negative.

Formerly regularly used thus (and as in b) in distinction from *yea* (see YEA 1); the distinction became obsolete soon after 1600, and since then *yes* has been the ordinary affirmative particle in reply to any question positive or negative, and *yea* has become archaic. The distinction was still observed in the Bible of 1611, in which *yes* occurs four times (all in N T.), always after a negative question or statement: the Revisers of 1881, apparently in ignorance of the usage, have altered it in all these instances to *yea*.

Yesterday (yeˑstəɹdɛ, -di), *adv., sb.,* and *a.* Forms: *a.* 1 *geostran-, gystran-, gioster-, geostor dæg,* 3–6 *ijster-* (3 *yistere-, 4 yester-, yisterie-, ystir-, 3 ystyre-, ijhister-, yhistir-, yhystir-, 3 ystor-, 5 ystur-, 3 ystyr-, 3 yster-, 3 ustir-, 6 ysister-, yister-, ir-, ydial.yisser-),-4-yesterday. *β.* 1 *syrstan-, sierstandæg,* 3 *yersten-, yurster-, yursten-, yorsten-, 3 yorstnen-, 4 yurstday, 5 yurston-, yerstendaye,* 4 *3istal, -ay,* 8 *ye(r)stai.* (Also 1–6 occas. as two words.) [OE. *geostran, gystran dæg,* Lindisf. Gosp. *gioster dæg,* Rushw. Gosp. *gestor dage,* a kin with metathesis (*YG*), *gisterdæg, gyrstan dæg.* The only known parallel to this collocation is Goth. *gistradagis afpaus,* to-morrow; in OE., the simple *giestron* is found only once, but in the other languages the simple word is regularly used alone in the sense of 'yesterday': OFris. **iester, *iersi(n)ne* (NFris., WFris. *jister,* E.Fris. *jursen, jersten*), MLG. *gisteren, -ern(e,* (LG. *gistern, gistер(n),* MDu. *ghisteren, ghister* (Du. *gisteren,* also *dag van gister*), OHG. *gestaron, gest(e)rn* (MHG. *gestern, gester,* G. *gestern*). The word has the form (with and without inflexional *-n*) of a comparative **ghistr-, ghjestr-* (cf. L. *hester-nus* of yesterday) of an Indo-eur. **ghjes* represented outside Teutonic by Skr. *hyás,* Gr. *χθές,* Alb. *dje,* L. *heri* yesterday (ON. *í gær* yesterday, to-morrow, shows a variant with long vowel).

The twofold meaning exhibited in the above forms and in OHG. *hestern* day before yesterday, and after to-morrow, indicates that the original application of the word was to a day preceding or following the present. The following apparent example of the English word with the meaning 'to-morrow' is isolated:—

This verb has had a remarkable sense-development in English owing to its having been used as an equivalent of L. *reddere* and F. *rendre*, or their compounds. In some of the related languages the word has shown tendencies to develop in the same directions, but the only generally surviving senses on the Continent are 'to be worth, to be valid, to concern, apply to', which are not represented at all in the English word.]

Yl, obs. form of ILL, ISLE.

-yl (il), formerly occas. **-ule**, a terminal element of chemical terms, as Ed. *F. -yle* (also *-ule*), f. Gr. ὕλη wood, matter, substance (see ILYLE), used for 'chemical principle, radical'. It was introduced by Wöhler and Liebig (*Ann. de Chimie*, 1832, LI. 286), and first used by them in the term *benzoyle*; other early names were *ethyle* (*Ethule*), *bayle* (Berzelius), *dadyle*, *peucyle*, *citronyle*, *citryle* (Blanchet and Sell). Some fifteen in anglicized form, including *acetyl*, *amyl*, *cinnamyl*, *glyceryl*, *salicyl*, appear in the *Elements of Chemistry* by T. Graham, 1842, who also invented the general term *basyle* for a body which unites with oxygen to form a base. *Methyl* is peculiar in being a back-formation from *methylene*.
-yl is used in forming the names of radicals compounded of two or three elements in various atomic proportions, which behave in combination like simple elements and are the constant bases of series of compounds (though they may not be themselves obtainable in a free state). Thus *carbonyl* CO, *hydroxyl* HO, *sulphuryl* SO_2, are compounds of carbon, hydrogen, and oxygen respectively. The greater number are compounds of carbon and hydrogen, either alone, as *amyl*, *ethyl*, *acetyl*, *tritryl*, or with oxygen, as *acetyl*, *lactyl*.

† **Yode, yede,** *v. Obs.* Past tense of Go *v.* (= went, went away, proceeded, took his course). [14th cent. ME. (north-east midland) *yeode, yede*, (west.) prob. altered form of OE., ME. *eode* (*ede, ōd*), pa. t. of Go *v.*, by prothesis of *y*-glide induced by the hiatus in such collocations as *he eode, we eoden*. Later, when the form *yede*, arising from the development of *eo* as a rising diphthong, became established, it would help to extend the currency of the form *yede* by analogical influence upon *ede*, the normal representative of *eode* with a falling diphthong. A parallel development is furnished by ME. *York*, *York* :—OE. *Eoforwīc* (see YORK). Modern use, the OE. compound form *geōde*, pa. t. of *gegān* GO *v.*, examples of which are here given with the meaning of the simple *ēode*, may have survived in localities where the prefix *ge-* = Y- persisted in ME., and so have furthered the spread of *yede* and *yode*.

The Yorkers they will bee content with bold Tabacco-stock. What should I say? here is good Veale for the Essex-man. 1673 KIRKMAN *Unlucky Citizen* 138 She was a right Yorker, being of that Country breed, and as full of dissimulation and hipocrisy as most of that Countrey. 1847 H. Yorker2 (yōəkəɹ). *Cricket.* [? Same word as prec.] (See quot. 1888.)

1870 *Sporting Mag.* Oct. 90 A fast Yorker is as disagreeable a first ball as an incoming batsman could receive. 1888 A. G. STEEL *Cricket* (Badm. Libr.) iii. 133 The ordinary definition of a 'yorker' is a ball that pitches inside the crease, and this, no doubt, is correct so far as it goes, but it does not go far enough. It really should be, any ball that pitches directly underneath the eye. It is quite impossible for a man to be bowled out with a 'yorker' when he is two or three yards out of his ground, if he misjudges the ball, and allows it to pitch directly beneath his bat, although the ball pitches as far from the crease as he is standing. The most deadly sort of 'yorker', however, is the one that pitches about three or four inches inside the crease.

Young lady.

1. A lady who is young; a young woman, usually unmarried, or a girl, of superior social position; formerly often used to connote the artificiality, primness, sentimentality, etc., attributed to young ladies

This and the following are avoided in polite use, except among some old fashioned speakers and jocularly. Various particular applications formerly existed thus, from the 17th to the early 19th cent. a young woman or a girl waited upon by a maid servant was called 'her young lady', until late in the 19th cent girls at boarding schools were spoken of and addressed as young ladies. At the present day the term is free applied, with the intention of avoiding the supposed derogatory implication of *young woman*, to female shop assistants, clerks of good appearance and manners.

For the vocative use, see Vb 20 a 1.

On the pronunciation John Walker in his *Pronouncing Dict.* 1791, says: 'When the emphasis is upon this word, it is always pronounced full and open like the noun *Ewer*; as, "The moment I had read *Your* letter I sat down to write *Mine*"; but when it is not emphatical it generally sinks into *yur*, exactly like the last syllable of *Lawy-yer* as, "I had just answered *your* first letter as *your* lawyer arrived." Here if we were to say *Ewer* I had just answered *your* first letter as *your* last arrived," with *your* sounded full and open like *Ewer*, as in the former sentence, every delicate ear would be offended.'

Yt, obs. form of It, Yet *adv.*

Ytter (i·tər). *Min.* The first element of *Ytterby* (see next) used attrib. = combined with yttria, yttriferous, yttrious, in imitation of Sw. or Ger., as in Sw. *ytterjord*, G. *yttererde* (ytter earth).

1805 R. Jameson *Syst. Min.* II. 585 Ytterianthalite.—According to Eckeberg, it is composed of tantalium, the new earth called yttria, and iron. 1807 *R. H. Danes Elements Min.* 281 Yttriferous, or Ytter garnet. 1827 *Ann. Kep. Smithsonian Inst.* 239 As early as 1794 Gadolin had separated from the gadolinite of Ytterby an earth which he called ytter earth.

Ytterbite (i·tərbəit). *Min.* [Named by Gadolin 1794, from *Ytterby* in Sweden, where found: see -ite 1.] A synonym of Gadolinite. So **Ytterbia** (itə·rbiă) *Chem.*, the oxide of ytterbium; **Ytterbic** (itə·rbik) *a.*, containing ytterbium; **Ytterbium** (itə·rbiŏm) [mod. L. (Marignac)], a rare metallic element occurring in gadolinite, etc.

1839 Ure *Dict. Arts* 1. Gadolinite called also Ytterbite and Yttertite. 1879 *Fownes' Chem. Sec.* XXXVI. 118 Ytterbium, a new Metal from Gadolinite.—Solutions of ytterbia give no absorption-spectrum. .. Ytterbium sulphate resembles .. the sulphates of yttrium and erbium.

Yttérite (i·tərəit). *Min.* [*f. Ytterby* (see Ytterbite) + -ite 2.] A synonym of Gadolinite.

1849 Watts tr. *Gmelin's Handbk. Chem.* III. 409 Silicate of Yttria.—Gadolinite, or Yttérite.

Yttria (i·triă). *Chem.* Also **ittria**. [mod. L. (Ekeberg, 1797), f. the name of *Ytterby*: see Ytterbite.] An earth obtained as a white powder from gadolinite and other rare minerals, consisting of sesquioxide of yttrium (Y_2O_3).

1800 Henry *Epit. Chem.* (1808) 105 Yttria, or Ittria.—This earth was discovered in 1794, .in a stone from Ytterby in Sweden. 1873 *Fownes' Chem.* (ed. 11) 582 To obtain the earths, yttria and erbia, in the separate state, gadolinite is digested with hydrochloric acid.

Yttrium (i·triŏm). *Chem.* [mod.L., f. Yttria after names of other metals in *-ium*.] A rare metal of the cerium group, the base of the earth Yttria. Symbol Y.

1820 *Imison's Sci. & Art* II. 93 The base of yttria has been supposed to be a metallic substance, which would receive the name of yttrium. 1866 Roscoe *Elem. Chem.* 8 The metals yttrium, erbium, indium, &c. have only as yet been met with in most minute quantities.

Hence (or from prec.) **Yttrialite** (i·triălăit) *Min.*, a silicate of thorium and the yttrium metals; **Yttric** (i·trik) *a. Chem.*, related to or containing yttrium; **Yttri·ferous** *a.*, containing or yielding yttrium; **Yttrious** (i·triəs) *a.*, pertaining to or containing yttria; **Yttrite** (i·trəit) *Min.*, a synonym of Gadolinite.

Yttro- (i·tro), *Min.*, used as combining form of Yttrium in names of minerals containing yttrium, the second element usually indicating the other metallic constituent, sometimes an allied mineral: as ***yttrocerite** (-sĭ·rəit) [Cerium], **Yttrocolu·mbite** [Columbium], **Yttrogra·mmite** [Gummite], **Yttrota·ntalite** [Tantalum], **Yttrotita·nite** [Titanium]: see quots.

Z.

Z (zed), the twenty-sixth and last letter of the English and other modern alphabets, derives its form, through the medium of the Latin and Greek alphabets, from the Phœnician and ancient Hebrew Ⅱ ז Ζ (Hebrew *zayin*); in the Phœnician, Greek, and earlier Roman alphabets it was the seventh letter, in the later Roman alphabet the twenty-third. Greek Ζ (ζ seems to have had originally the phonetic value (zd) or (dz), but later simple (z). Instances of *s* are found in early Latin, but Greek ζ was more commonly represented initially by *s*, e.g. *sona* (Plautus) = *ζωνη*, and medially by *ss*, e.g. *cassissor* = *καμάζω*, *massa* = *μᾶζα* Mass *sb.*[3], but after B.C. 100 *s* came into regular use to render the ζ of Greek loan-words. In consequence of the phonetic change of (dz) to (dy) exemplified by the spelling *baptidiare* for *baptizare*, Gr. *Βαπτίζειν* to baptize, *z* in popular Latin came to denote (dy) and probably (y), as in *zaconus* for *diaconus* deacon, *zeta* for *dieta* (see ZETA 1), *zunior* for *junior* (cf. the spellings *Zopen*, *Zope* in Cursor Mundi for *Joppa*). For the use of *s* for initial *x* see X.

Z was used in OE. in the spelling of alien words, and (with or without *t* or *d*) in certain loan-words, as *bæ(d)zere* (L. *baptista* + *-ere* -ER[3]) baptist, *mertze* (L. *mercem*, *merx*), with the value (ts); this use was continued in ME., e.g. *mildze*, *milt(c)e*, MILCE *sb.*, and was reinforced by French usage, as shown in forms like *calis* chalice, *crois* cross, *vois* voice, *vestimens*, pl. of *vestiment*. This phonetic value is preserved in, and indicated by the spelling of, mod. E. *assets* (AF. *asets*, OF. *asez* enough, pop. L. *ad-satis*) and the patronymic prefix *Fitz-* (AF. *fis* = *fius*, *fils*, L. *filius*).

In French, the reduction of (ts) to (s) brought about a change of spelling from *z* to *s* (often alternating with *x*, e.g. *vois*, *voix*), and this helped to set free *z* to denote the voiced *s* appropriate to such 'learned' adoptions as *zone* (which appears as early as the 13th c., Ph. de Thaun). In English, by the end of the 13th c., *z* is found with the later OF. value (z) in 'learned' words, e.g. *sizanny* tares (Cursor Mundi 1138); it is conspicuous in the Ayenbite of Inwyt (c 1340) as the symbol for the voiced *s* characteristic of southern dialects (e.g. Kentish *zenne*, OE. *synn* sin); by the end of the 14th c. the character had become general, e.g. *gaze*, *mazed*, *canonize*.

In MSS. of 1300 onwards the tailed *z* and *ȝ* came to be indistinguishable in form (cf. first quot. s.v. ZED); hence in modern editions are found many instances of spellings such as *jelot* zealot, *Sarzine* Saracen. This identity of the two symbols was perpetuated in the typography of early Scottish printers, who represented the sounds (y) and (z) by the same characters, as in such words as *ze* ye, *seir* year, *fornet* forget, *fenzeit* feigned, and *azure*, *sele* seal. This confusion has led to the general mispronunciation by Englishmen of *capercailzie* (-*kɛ́·lyi*, corruptly -*kɑ́·lai*), and proper names such as *Cadzow*, *Dalziel*, *Mackenzie*, *Menzies* (mi·ŋis).

In the J. RAMSAY *Ms. Autobiography* (1888) I. 22 *note*, He [*sc.* Lord Kames] used to say that pronouncing the letter *z* in the names Mackenzie and Menzies in the English was enough to turn his stomach.

The name given to the letter in England (presumably since the Norman Conquest) has been ZED, q.v., or one of its variants, †ZAD, †ZARD, IZZARD, EZOD, UZZARD. With the disyllabic forms, which survive dialectally, cf. F. *edez*, ? for *esed* (Coyfurelly, 14th cent.), *ized* (Claude de Saint-Lien, 1580), Prov. *izedo*, Cat. *izdeta*, app. from pop. L. **izdeta*, a. Gr. *ζῆτα* (dzɛ̂·ta). The names *es* (Gil, Logonomia Anglica, 1619) and *ze* (C. Butler, Eng. Gram., 1633) do not seem to represent actual usage, but are (like *ya* and *yi* as names of *y*) systematic inventions of these phonetic writers. The name ZEE, now widespread in the United States of America, appears to have had some early currency in England.

Initially and medially *z* occurs largely in words of Greek or Oriental origin, e.g. *zeal*, *azimuth*, *Amazon*, *zenith*; and in this Dictionary the spelling of the suffix derived ultimately from Greek *-ίζειν* has been normalized throughout as -IZE, q.v. In other classes of words the use of *z* has been determined by various circumstances, e.g. the immediate source of the word, as in *bronze*, or the desirability of an unambiguous or distinctive spelling, as in *ooze* (cf. *loose*), *prize* (cf. *price*). It is found in a number of monosyllabic words (and their derivatives), as *craze*, *daze*, *laze*, *maze*, *doze*, *glaze*, *gauze*, *furze*, *blouze*, *size*, *assize*, *seize*, *freeze*, *wheeze*.

One fact which has told against an extensive use of it instead of *s* to represent the sound (z) is the difficulty of writing the character rapidly and intelligibly; this is referred to by Mulcaster, 1st Part of Elementarie, 1582, p. 123:—

Z, is a consonant much heard amongst vs, and seldom seen. I think by reason it is not so redie to the pen as *s*, is, which is become lieutenant generall to *z*, as gase, amaze, thuse, where *z*, is heard, but, *s*, seas.

It is remarkable that in the three words cited by him the ultimate decision has been in favour of the spelling with *s*. In certain words usage fluctuated even in modern times until *s* or *z* prevailed, as in *tease* and †*teaze*, *pose* and †*poze*, *surprise* and †*surprize*; *vase* and *raze* are specifically differentiated.

Z is normally employed to denote (z), the bladed open-voice consonant, the voiced analogue of (s). In the combination *-azure* in *azure* it denotes (ʒ), a sound commonly denoted by other means, as in *pleasure*, *decision*, *lesion*, *transition*.

The word was orig. used to denote that part of medical science which treats of the medicines or remedies obtainable from animals; e. g. in the title of T. The sense first recorded in English dictionaries is 'a treatise concerning living creatures' (Bailey, 1726) and is still the only one in Todd's Johnson, 1818.]
